

Indian Government Schemes Related to Farming & Agriculture

Comprehensive Farmer & Agri-Enterprise Compendium — 2026 Edition

Scope: Major Central Government schemes, missions, financing programmes, insurance, irrigation, mechanization, soil health, organic/natural farming, marketing, infrastructure, farmer organizations and selected allied-income programmes.

Important: This guide is designed as a practical reference, not a substitute for the latest State/UT notification. Many agricultural programmes are implemented through State Annual Action Plans, district offices, banks, FPOs or notified project windows. Subsidy ceilings, crop lists, application dates and beneficiary conditions can change.

Prepared using official Government of India / ministry / PIB / scheme-portal material available through August 2026.

What this PDF helps you answer	Examples
Which schemes give direct money?	PM-KISAN, selected organic/natural-farming incentives
Which schemes reduce financial risk?	PMFBY, PM-AASHA
Which schemes reduce input/capital cost?	KCC/MISS, PMKSY, SMAM, PM-KUSUM
Which schemes support infrastructure?	AIF, AMI, MIDH, Operation Greens
Which schemes improve market access?	e-NAM, FPO scheme, PM-AASHA
Which schemes improve sustainability?	Soil Health Card, PKVY, NMNF, PM-RKVY

1. Executive Overview

India's agricultural support system is not one single subsidy programme. It is a layered policy stack. A farmer may simultaneously use income support, institutional credit, crop insurance, irrigation assistance, machinery support, soil diagnostics, market platforms and collective-organization programmes.

The most useful way to understand the ecosystem is by the farmer's problem:

Farmer problem	Most relevant schemes/programmes	Typical support type
Need immediate income support	PM-KISAN	DBT income support
Need seasonal working capital	KCC + MISS	Institutional credit + interest support
Fear of crop failure	PMFBY	Crop insurance
Need irrigation / drip / sprinkler	PMKSY / PDMC	Infrastructure/subsidy via State programmes
Need solar pump / farm solarization	PM-KUSUM	Capital subsidy / project support
Need fertilizer recommendation	Soil Health Card	Testing + advisory
Need machinery	SMAM	Capital subsidy / CHC access
Need warehouse/cold storage/processing	AIF / AMI / MIDH	Credit + interest support / subsidy
Need better market price discovery	e-NAM / PM-AASHA	Digital market / procurement
Want organic farming	PKVY / MOVCD-NER	Cluster/value-chain support
Want natural farming	NMNF	Cluster, training and adoption incentive
Need farmer collective bargaining	10,000 FPO scheme	Organization + handholding + finance access
Want pension/social security	PM-KMY	Contributory pension

Current architecture note

In October 2024, the Union Cabinet rationalized many centrally sponsored agriculture schemes into two umbrella structures: PM-RKVY for sustainable agriculture and Krishonnati Yojana for food security/agricultural self-sufficiency. This means that an older scheme name may now be a component under an umbrella rather than a completely separate funding architecture.

2. Scheme Classification

Class	Schemes in this compendium
Direct farmer income / social security	PM-KISAN; PM-KMY
Credit / finance	KCC + MISS; AIF
Risk and price protection	PMFBY; PM-AASHA
Water / energy	PMKSY; PM-KUSUM
Inputs / productivity	Soil Health Card; SMAM; NFSNM; NMEO-OS
Organic / natural farming	PKVY; NMNF; MOVCD-NER
Markets / collective action	e-NAM; 10,000 FPO Scheme; AMI
Horticulture / value addition	MIDH; Operation Greens
Digital public infrastructure	Digital Agriculture Mission
Allied farm income	NBHM

Class	Schemes in this compendium
State-flexible agriculture development	PM-RKVY; Krishonnati Yojana

3. PM-KISAN — Pradhan Mantri Kisan Samman Nidhi

Category: Direct income support | Central Sector Scheme

Nodal ministry/agency: Ministry of Agriculture & Farmers Welfare (DA&FW;)

1) What problem does it solve?

Provide predictable income support to eligible land-holding farmer families so they can meet farm-input and household needs.

2) What does the farmer/beneficiary actually get?

₹6,000 per year per eligible farmer family, paid in three equal instalments of ₹2,000 through DBT into the Aadhaar-seeded bank account.

3) Who is eligible?

Cultivable landholding is the primary criterion, subject to statutory exclusion categories. The scheme is family-based rather than a payment per acre.

4) How is it accessed?

Registration/verification is routed through the PM-KISAN system and State/UT authorities; eKYC is mandatory. Farmers should use the official PM-KISAN portal/app or assisted channels such as CSCs where applicable.

5) Common documents / information

Aadhaar, bank-account details, land/landholding records and mobile/contact details; exact verification requirements can vary by State/UT.

6) Important caveat

Land records, Aadhaar-bank seeding, eKYC and exclusion checks are important. The official portal currently warns about suspected duplicate/late-acquired-land cases being withheld pending verification.

Official source trail: PM-KISAN official portal; PIB releases on PM-KISAN instalments and implementation.

4. PM-KMY — Pradhan Mantri Kisan Maandhan Yojana

Category: Social security | Pension

Nodal ministry/agency: Ministry of Agriculture & Farmers Welfare; LIC is pension fund manager

1) What problem does it solve?

Create an old-age social-security floor for small and marginal farmers.

2) What does the farmer/beneficiary actually get?

Minimum assured pension of ₹3,000 per month from age 60, subject to eligibility. The farmer makes a monthly contribution of ₹55–₹200 depending on entry age and the Government makes a matching contribution.

3) Who is eligible?

Small and marginal landholding farmers, entry age 18–40 years, subject to exclusion conditions.

4) How is it accessed?

Enrollment is voluntary; farmers can enroll through designated PM-KMY/CSC channels and linked pension infrastructure.

5) Common documents / information

Aadhaar, bank account, landholding/farmer details and mandate for contribution; exact local enrollment requirements should be confirmed at the point of registration.

6) Important caveat

This is a contributory pension, not a free cash transfer. The benefit is payable only after reaching the pension age and continuing under scheme rules.

Official source trail: PIB, 5 Aug 2025 and 2026 farmer-welfare backgrounders.

5. KCC + MISS — Kisan Credit Card and Modified Interest Subvention Scheme

Category: Institutional farm credit | Working capital

Nodal ministry/agency: Department of Financial Services / Ministry of Agriculture & Farmers Welfare ecosystem; implemented through banks

1) What problem does it solve?

Provide timely, affordable institutional credit for cultivation and eligible allied activities.

2) What does the farmer/beneficiary actually get?

As reported by PIB in March 2026, the MISS-linked KCC loan limit has been enhanced to ₹5 lakh and collateral-free credit to ₹2 lakh per borrower. Interest support and repayment incentives operate under applicable MISS rules.

3) Who is eligible?

Farmers including small and marginal farmers; current policy also supports tenant farmers, sharecroppers and eligible JLG/SHG structures through banking channels.

4) How is it accessed?

Apply through participating commercial banks, Regional Rural Banks, cooperative banks and other eligible lending institutions. Banks assess the farmer's credit requirement and documentation.

5) Common documents / information

Identity/KYC, land or cultivation evidence as applicable, bank account and crop/credit details. Tenant/sharecropper/JLG requirements depend on the lender and local policy.

6) Important caveat

KCC is a credit facility, so the farmer remains liable for the loan. Interest benefits depend on prompt repayment and the applicable government/bank rules.

Official source trail: PIB, 11 Mar 2026 KCC explainer; RBI/banking implementation framework.

6. PMFBY — Pradhan Mantri Fasal Bima Yojana

Category: Crop-risk insurance

Nodal ministry/agency: Ministry of Agriculture & Farmers Welfare

1) What problem does it solve?

Protect farmers against financial losses from notified crop failures and stabilize farm income.

2) What does the farmer/beneficiary actually get?

Farmer premium is capped at 2% of sum insured for Kharif foodgrain/oilseed crops, 1.5% for Rabi foodgrain/oilseed crops and 5% for annual commercial/horticultural crops, with the balance subsidized under scheme rules.

3) Who is eligible?

Farmers with insurable interest in notified crops/areas. Coverage is subject to State/UT notifications and crop-season conditions; the current operational framework is not identical across every crop and state.

4) How is it accessed?

Enroll through the PMFBY portal, banks, insurers or designated channels before the notified cut-off. The portal provides premium calculation, policy status and loss/grievance functions.

5) Common documents / information

Farmer identity, bank details, land/cultivation details, crop and area details, and any documents required by the notified process.

6) Important caveat

Coverage is not blanket protection against every loss. Notified risks, cut-off dates, crop/area notifications, loss-assessment rules and exclusions matter. Localized calamities and specified post-harvest losses have specific procedures.

Official source trail: PMFBY official portal, guidelines and FAQ; updated portal pages accessed Aug 2026.

7. PMKSY — Pradhan Mantri Krishi Sinchayee Yojana

Category: Irrigation and water-use efficiency

Nodal ministry/agency: Multi-ministry programme; agriculture components implemented by DA&FW; and related departments

1) What problem does it solve?

Expand assured/protective irrigation and improve water-use efficiency, following the 'Har Khet Ko Pani' and 'Per Drop More Crop' approach.

2) What does the farmer/beneficiary actually get?

Supports irrigation infrastructure and, through Per Drop More Crop (PDMC), micro-irrigation such as drip and sprinkler systems. Support is generally routed through State action plans and beneficiary schemes.

3) Who is eligible?

Farmer eligibility and subsidy intensity depend on the component, State/UT programme and approved annual plan.

4) How is it accessed?

Apply through the State agriculture/horticulture/irrigation machinery designated for the relevant component.

5) Common documents / information

Land/cultivation proof, identity, bank details, proposed irrigation system/area and vendor/project documents where required.

6) Important caveat

PMKSY is an umbrella programme; do not assume every PMKSY component is a direct farmer subsidy. The relevant State component determines the actual assistance.

Official source trail: PMKSY operational guidelines; PIB June 2026 PMKSY backgrounder.

8. PM-KUSUM — Pradhan Mantri Kisan Urja Suraksha evam Utthaan Mahabhiyan

Category: Solar energy for agriculture

Nodal ministry/agency: Ministry of New and Renewable Energy (MNRE)

1) What problem does it solve?

Reduce diesel dependence, lower farm-energy costs and create additional income opportunities from solar power.

2) What does the farmer/beneficiary actually get?

Components support grid-connected solar plants, standalone solar pumps and solarization of existing grid-connected agricultural pumps/feeders. The national portal describes central subsidy support of up to 30% or 50% depending on component/state structure; farmers may also sell electricity from eligible plants to DISCOMs at the state-regulator-determined tariff.

3) Who is eligible?

Farmers and other eligible project categories under Components A/B/C; implementation is through designated State departments/agencies.

4) How is it accessed?

Apply when the State implementing agency opens applications for the relevant component.

5) Common documents / information

Identity, land/pump ownership or eligibility evidence, bank details, electricity connection details where relevant, and project/land documents for Component A.

6) Important caveat

Actual farmer contribution, subsidy, vendor selection, feeder/pump eligibility and tariff vary by State and component. Treat the national percentage as a framework, not a guaranteed personal subsidy.

9. Soil Health Card / Soil Health & Fertility

Category: Soil diagnostics and nutrient management

Nodal ministry/agency: Ministry of Agriculture & Farmers Welfare

1) What problem does it solve?

Provide plot-level soil diagnostics and crop-specific nutrient recommendations to rationalize fertilizer use and improve soil health.

2) What does the farmer/beneficiary actually get?

A Soil Health Card reports 12 parameters: N, P, K, S, Zn, Fe, Cu, Mn, B, pH, EC and organic carbon, along with recommendations for nutrient/fertilizer management.

3) Who is eligible?

Designed for farmers across India; testing is delivered through government and approved soil-testing infrastructure.

4) How is it accessed?

Obtain soil testing through the Soil Health Card system, State agriculture departments, soil-testing labs or village/mobile labs as available.

5) Common documents / information

Land/plot identifiers and farmer contact information may be requested for sample collection and card generation.

6) Important caveat

The card is advisory. Best results come from actually following the crop-specific nutrient recommendations and combining them with local agronomic advice.

Official source trail: PIB Soil Health Card releases, 2025–2026.

10. SMAM — Sub-Mission on Agricultural Mechanization

Category: Farm machinery | Precision agriculture

Nodal ministry/agency: Ministry of Agriculture & Farmers Welfare

1) What problem does it solve?

Increase access to modern farm machinery, reduce drudgery and improve productivity, especially for small and marginal farmers.

2) What does the farmer/beneficiary actually get?

Current PIB reporting states that assistance can cover 40% of machine cost for general beneficiaries and 50% for SC/ST farmers, small/marginal farmers and beneficiaries in North-Eastern states, subject to machine-wise ceilings and guidelines. Support also covers Custom Hiring Centres, Farm Machinery Banks and drone demonstrations/services.

3) Who is eligible?

Individual farmers and eligible groups/entrepreneurs for different components; state-level implementation determines the open equipment list and subsidy ceiling.

4) How is it accessed?

Apply through the State agriculture mechanization portal/department when the relevant component opens.

5) Common documents / information

Farmer identity, land/farm details, bank account, category certificate where relevant and equipment/vendor quotation or registration information where required.

6) Important caveat

Percentage subsidy is not the same as unlimited reimbursement; machine-wise maximum permissible assistance and State allocations apply.

11. AIF — Agriculture Infrastructure Fund

Category: Agri-infrastructure finance

Nodal ministry/agency: Ministry of Agriculture & Farmers Welfare

1) What problem does it solve?

Finance post-harvest management infrastructure and community farming assets.

2) What does the farmer/beneficiary actually get?

₹1 lakh crore financing facility; eligible loans receive 3% annual interest subvention and credit-guarantee support, with current scheme documents describing support around eligible loans up to ₹2 crore. Eligible projects include warehouses, cold storage, grading/sorting, processing and community assets.

3) Who is eligible?

Farmers, FPOs, PACS, cooperatives, SHGs, agri-entrepreneurs and other eligible entities/project structures under the guidelines.

4) How is it accessed?

Submit an eligible project through the AIF portal and a participating lending institution. The lender appraises the project and the government support is applied under the scheme.

5) Common documents / information

KYC, land/lease/project documents, DPR/business plan, quotations, financial statements where applicable, bank documents and entity registration documents.

6) Important caveat

AIF is primarily debt financing, not a grant. Interest subvention/guarantee applies only to eligible loans/projects and is subject to lender appraisal and scheme conditions.

Official source trail: AIF official documents and PIB agriculture-infrastructure releases, 2015–2026.

12. e-NAM — National Agriculture Market

Category: Digital agricultural marketing

Nodal ministry/agency: Ministry of Agriculture & Farmers Welfare; implemented through SFAC

1) What problem does it solve?

Create a pan-India electronic trading platform connecting physical wholesale markets to improve price discovery and market access.

2) What does the farmer/beneficiary actually get?

Farmers get transparent bidding, access to more buyers/markets, real-time price/arrival information, assaying-linked quality discovery and electronic payments.

3) Who is eligible?

Farmers selling eligible commodities through participating e-NAM mandis/market yards.

4) How is it accessed?

Register via the e-NAM portal/app or through an e-NAM mandi. The official farmer page says registration has no fee and asks for basic identity/contact/bank details and proof such as a passbook and government ID.

5) Common documents / information

Name/address/contact details, bank information, government identity proof and passbook/cheque leaf as requested.

6) Important caveat

e-NAM improves market connectivity but does not guarantee a specific sale price; actual price depends on commodity quality, bids, arrivals, local market conditions and applicable APMC rules.

Official source trail: Official e-NAM farmer portal; PIB 2025 e-NAM statistics.

13. AMI — Agricultural Marketing Infrastructure

Category: Warehousing and rural market infrastructure

Nodal ministry/agency: Ministry of Agriculture & Farmers Welfare under Integrated Scheme for Agricultural Marketing

1) What problem does it solve?

Strengthen rural agricultural marketing infrastructure, especially storage/godown capacity.

2) What does the farmer/beneficiary actually get?

Demand-driven, credit-linked back-ended subsidy for eligible storage/marketing infrastructure; historical official guidance cites subsidy rates of 25% or 33.33% depending on beneficiary/category.

3) Who is eligible?

Individuals, farmer groups, FPOs and other eligible entities under AMI guidelines.

4) How is it accessed?

Project proposals are routed through the applicable State/implementing agency and lending institution.

5) Common documents / information

Entity/identity documents, land and project documents, DPR, bank financing and category details where applicable.

6) Important caveat

AMI is primarily infrastructure support, not a direct cash payment to every farmer. Current eligibility and subsidy ceilings should be checked against the latest operational guidelines.

Official source trail: PIB agriculture-infrastructure material and AMI/ISAM guidance.

14. MIDH — Mission for Integrated Development of Horticulture

Category: Horticulture development

Nodal ministry/agency: Ministry of Agriculture & Farmers Welfare

1) What problem does it solve?

Holistically develop fruits, vegetables, spices, flowers and other horticulture segments from production through post-harvest handling.

2) What does the farmer/beneficiary actually get?

Support spans planting material, protected cultivation, nurseries, productivity improvement and post-harvest infrastructure. Current official reporting describes credit-linked back-ended assistance of 35% of project cost in general areas and 50% in hilly/scheduled areas for specified cold-storage infrastructure.

3) Who is eligible?

Farmers and eligible groups/entrepreneurs; many infrastructure components are open to FPOs, cooperatives, companies, SHGs and other entities.

4) How is it accessed?

State Horticulture Missions and designated implementing agencies administer farmer and project components.

5) Common documents / information

Identity, land/lease documents, horticulture plan/project details, bank documents and technical estimates as applicable.

6) Important caveat

MIDH is a broad mission. The assistance rate and ceiling depend heavily on the specific horticulture intervention and State Annual Action Plan.

Official source trail: PIB MIDH releases, including 28 Jul 2026 and 22 Jul 2025.

15. NFSNM — National Food Security & Nutrition Mission

Category: Crop productivity and food/nutrition security

Nodal ministry/agency: Ministry of Agriculture & Farmers Welfare

1) What problem does it solve?

Increase production of pulses, nutri-cereals, rice, wheat and other targeted crops while improving farm productivity.

2) What does the farmer/beneficiary actually get?

Through States/UTs, support can include demonstrations, crop-production/protection technologies, certified seed distribution, integrated nutrient/pest management and farmer training.

3) Who is eligible?

Farmers in notified/targeted districts and crop programmes, with actual component availability determined through State annual plans.

4) How is it accessed?

State agriculture departments, district agriculture offices, KVKs and other implementing agencies.

5) Common documents / information

Farmer registration/land and crop details; exact requirements vary by intervention.

6) Important caveat

Benefits are often input/service based rather than a single national cash amount. State crop priorities and annual plans matter.

Official source trail: PIB, 25 Mar 2025 NFSNM release.

16. PKVY — Paramparagat Krishi Vikas Yojana

Category: Organic farming

Nodal ministry/agency: Ministry of Agriculture & Farmers Welfare under PM-RKVY

1) What problem does it solve?

Promote cluster-based organic farming with end-to-end support from production to certification and marketing.

2) What does the farmer/beneficiary actually get?

Current official reporting provides ₹31,500/ha for three years in organic clusters; ₹15,000/ha is provided directly to farmers through DBT for on-/off-farm organic inputs. Additional support covers marketing, packaging, branding, value addition and certification.

3) Who is eligible?

Farmers participating in approved organic clusters outside the North-Eastern region.

4) How is it accessed?

Enrollment occurs through State/UT organic-farming programmes and cluster implementing agencies.

5) Common documents / information

Farmer identity, land/cluster participation records and bank details; certification-related records where applicable.

6) Important caveat

PKVY is cluster-oriented; an individual farmer generally participates through the approved cluster rather than treating it as a standalone universal subsidy.

Official source trail: PIB, 4 Feb 2025 and 7 Feb 2025 organic-farming releases; 2025–2026 updates.

17. NMNF — National Mission on Natural Farming

Category: Natural/low-external-input farming
Nodal ministry/agency: Ministry of Agriculture & Farmers Welfare

1) What problem does it solve?

Scale scientifically supported natural farming, reduce dependence on externally purchased inputs and improve soil health, biodiversity and climate resilience.

2) What does the farmer/beneficiary actually get?

The mission targets 7.5 lakh hectares through 15,000 clusters and 1 crore farmers; PIB reported an incentive of ₹4,000 per acre per year for two years for adoption, alongside training, model farms and Bio-input Resource Centres.

3) Who is eligible?

Farmers enrolled in approved NMNF clusters/activities; implementation is through States/UTs.

4) How is it accessed?

Enroll through State/UT agriculture machinery and designated natural-farming clusters/extension workers.

5) Common documents / information

Farmer identity, land/cultivation details and bank details as required by State implementation.

6) Important caveat

The ₹4,000/acre figure is an adoption incentive under the mission, not a general agricultural subsidy. Exact disbursement is tied to approved cluster and implementation rules.

Official source trail: PIB NMNF releases, 28 Mar 2025, 13 Aug 2025 and 16 Dec 2025.

18. NMEO-OS — National Mission on Edible Oils–Oilseeds

Category: Oilseed production and value chain
Nodal ministry/agency: Ministry of Agriculture & Farmers Welfare

1) What problem does it solve?

Increase domestic oilseed production and move India toward self-reliance in edible oils.

2) What does the farmer/beneficiary actually get?

₹10,103 crore mission for 2024-25 to 2030-31. Supports breeder seed, cluster seed distribution, demonstrations, seed hubs/storage, farmer training, post-harvest infrastructure and value-chain interventions. Crops include rapeseed-mustard, groundnut, soybean, sunflower, sesame, safflower, niger, linseed and castor.

3) Who is eligible?

Farmers participating in notified State/cluster programmes; infrastructure and seed components may have different eligible entities.

4) How is it accessed?

State agriculture departments, KVKs and designated implementing agencies/cluster programmes.

5) Common documents / information

Farmer registration and land/crop details; additional documents for infrastructure/enterprise components.

6) Important caveat

Assistance is component-specific. A farmer should distinguish seed/demo/input support from capital infrastructure support.

Official source trail: PIB NMEO-OS Cabinet approval and 2025 implementation releases.

19. PM-RKVY — Pradhan Mantri Rashtriya Krishi Vikas Yojana

Category: Umbrella programme | Sustainable agriculture
Nodal ministry/agency: Ministry of Agriculture & Farmers Welfare

1) What problem does it solve?

Give States flexibility to fund agriculture projects according to local priorities while promoting sustainable agriculture.

2) What does the farmer/beneficiary actually get?

Part of the 2024 rationalized umbrella architecture; States can use the cafeteria framework for projects/beneficiary components and may reallocate across components according to approved rules.

3) Who is eligible?

Depends on the specific State-approved component/project.

4) How is it accessed?

Usually through State agriculture departments, district programmes and annual action plans rather than one national farmer application.

5) Common documents / information

Depends entirely on the selected component.

6) Important caveat

PM-RKVY is not one uniform subsidy. It is a State-implemented umbrella, so the practical benefit can differ substantially between States and years.

Official source trail: PIB Cabinet approval, 3 Oct 2024; PIB implementation/fund-disbursement releases.

20. Krishonnati Yojana (KY)

Category: Umbrella programme | Food security and agricultural self-sufficiency
Nodal ministry/agency: Ministry of Agriculture & Farmers Welfare

1) What problem does it solve?

Consolidate agriculture interventions focused on food security, productivity and agricultural self-sufficiency.

2) What does the farmer/beneficiary actually get?

The 2024 rationalization placed multiple centrally sponsored agriculture components under the KY umbrella. Benefits therefore depend on the component being implemented by the State/UT.

3) Who is eligible?

Component-specific; farmers participate through State programmes.

4) How is it accessed?

State agriculture departments and component-specific portals/implementing agencies.

5) Common documents / information

Component-specific.

6) Important caveat

Do not confuse the KY umbrella with a single cash-benefit scheme. The underlying component determines eligibility and support.

Official source trail: PIB Cabinet approval, 3 Oct 2024; PM-RKVY/KY implementation releases.

21. 10,000 FPO Scheme — Formation & Promotion of Farmer Producer Organizations

Category: Collective action | Farmer business organizations
Nodal ministry/agency: Ministry of Agriculture & Farmers Welfare; SFAC and other implementing agencies

1) What problem does it solve?

Organize farmers into economically viable producer organizations so they can aggregate inputs/produce, access technology, negotiate prices and build value chains.

2) What does the farmer/beneficiary actually get?

Support for formation and handholding of FPOs, business planning, capacity building, market linkages and access to a Credit Guarantee Fund and equity-related support under applicable guidelines.

3) Who is eligible?

Farmer groups/FPOs formed and promoted under the central scheme through eligible Cluster-Based Business Organizations (CBBOs) and implementing agencies.

4) How is it accessed?

Approach an empanelled CBBO, SFAC or relevant implementing agency. Existing FPOs should check whether they fall under the scheme's eligibility and handholding stages.

5) Common documents / information

FPO/entity registration documents, member/farmer records, bank account, business plan and governance documents.

6) Important caveat

The scheme primarily strengthens a collective entity; individual farmers benefit indirectly through the FPO's services, aggregation and market power.

Official source trail: SFAC official FPO scheme pages and operational-guideline repository, current 2026 pages.

22. PM-AASHA — Pradhan Mantri Annadata Aay Sanrakshan Abhiyan

Category: Price support and market intervention

Nodal ministry/agency: Ministry of Agriculture & Farmers Welfare; Price Stabilisation Fund under Consumer Affairs

1) What problem does it solve?

Improve price realization for farmers and reduce distress sales/price volatility.

2) What does the farmer/beneficiary actually get?

Integrated framework includes Price Support Scheme (PSS), Price Deficit Payment Scheme (PDPS), Market Intervention Scheme (MIS) and Price Stabilisation Fund (PSF). PSS can procure notified pulses, oilseeds and copra meeting FAQ standards at MSP when market prices fall below MSP, on State request.

3) Who is eligible?

Pre-registered farmers producing notified commodities and meeting the relevant procurement/quality rules; coverage depends on State activation and commodity.

4) How is it accessed?

Registration and sale are through designated State agencies/Central Nodal Agencies and notified procurement channels.

5) Common documents / information

Farmer identity, bank details, commodity/crop and registration records; quality/FAQ compliance is required for procurement.

6) Important caveat

MSP announcement does not mean unlimited procurement of every crop everywhere. PM-AASHA mechanisms are commodity-, State- and activation-specific.

Official source trail: PIB PM-AASHA releases, 2025–2026.

23. MOVCD-NER — Mission Organic Value Chain Development for North Eastern Region

Category: Certified organic value chains | North-East

Nodal ministry/agency: Ministry of Agriculture & Farmers Welfare

1) What problem does it solve?

Build certified organic clusters and integrated value chains for North-Eastern crops, including aggregation, processing and market/export linkages.

2) What does the farmer/beneficiary actually get?

Current official reporting cites ₹46,500/ha over three years for organic-farming/value-chain support, including organic inputs and FPO/value-chain development; exact component-wise allocation follows scheme guidelines.

3) Who is eligible?

Farmers and FPO/FPC structures in the North-Eastern States participating in approved clusters/value chains.

4) How is it accessed?

State agriculture/horticulture departments, designated agencies and FPO/cluster structures.

5) Common documents / information

Farmer identity, land/crop details, organic-cluster records and FPO/entity documents for collective projects.

6) Important caveat

This is specifically for the North-Eastern Region and is not the general national organic scheme for other States.

Official source trail: PIB organic-farming and NER releases; 2026 NER backgrounder.

24. NBHM — National Beekeeping & Honey Mission

Category: Apiculture | Pollination | Allied farm income

Nodal ministry/agency: Ministry of Agriculture & Farmers Welfare; National Bee Board

1) What problem does it solve?

Promote scientific beekeeping, honey quality, pollination and beehive-product value chains.

2) What does the farmer/beneficiary actually get?

Three Mini Missions support productivity/pollination, post-harvest management and research/technology. The mission has a total outlay of ₹500 crore for FY 2020-21 to 2025-26.

3) Who is eligible?

Beekeepers, farmer groups, value-chain entities, institutions and other eligible project proponents depending on the component.

4) How is it accessed?

Through the National Bee Board and designated implementing agencies/project calls.

5) Common documents / information

Identity/entity details, apiary/project plan, bank details and technical documents as applicable.

6) Important caveat

Not every component is an individual farmer cash subsidy; many supports are project/community/value-chain based.

Official source trail: PIB NBHM releases and 2025 mission backgrounder.

25. Digital Agriculture Mission

Category: Digital public infrastructure | Data and decision support

Nodal ministry/agency: Ministry of Agriculture & Farmers Welfare

1) What problem does it solve?

Build a farmer-centric digital public infrastructure so agricultural services can use reliable farmer, land, crop, soil, weather and geospatial information.

2) What does the farmer/beneficiary actually get?

₹2,817 crore approved in 2024. Core architecture includes AgriStack (Farmers Registry, Geo-referenced Village Maps, Crop Sown Registry), Krishi Decision Support System, soil fertility/profile mapping, Digital General Crop Estimation Survey and other IT initiatives.

3) Who is eligible?

This is mainly a public digital infrastructure mission rather than a standalone farmer subsidy.

4) How is it accessed?

Farmers interact indirectly and directly through digital farmer registries, crop/land records and services that use the infrastructure.

5) Common documents / information

Requirements vary by service; farmer registry generally relies on verified identity, land and crop records.

6) Important caveat

The mission can improve access to credit, insurance, procurement and advisory services, but State/UT rollout and data-verification status determine actual availability.

Official source trail: PIB Digital Agriculture Mission releases, 2 Sep 2024, 11 Feb 2025 and 12 Aug 2025.

26. Operation Greens

Category: Post-harvest management | Value chains

Nodal ministry/agency: Ministry of Food Processing Industries (MoFPI)

1) What problem does it solve?

Improve value realization and reduce post-harvest losses by strengthening integrated value chains for eligible horticultural produce.

2) What does the farmer/beneficiary actually get?

Originally focused on Tomato-Onion-Potato and subsequently broadened to other fruits/vegetables and eligible interventions. Support can cover value-chain infrastructure and market/logistics interventions under the applicable component.

3) Who is eligible?

Farmer groups/FPOs, processors, infrastructure/value-chain entities and other eligible applicants depending on the component.

4) How is it accessed?

MoFPI's scheme/EOI routes and project-based applications.

5) Common documents / information

Entity registration, project report, land/lease, financial documents, commodity/value-chain details and bank financing where applicable.

6) Important caveat

Operation Greens is project-driven and is not a universal per-farmer subsidy. Current eligible commodities and assistance depend on the active guidelines/component.

Official source trail: PIB/MoFPI releases on Operation Greens and agricultural infrastructure.

28. Practical Application Guide for Farmers

The biggest mistake is to search for a scheme by name alone. Start with the farm problem and then identify the implementing agency.

Step 1 — Establish your farmer profile

- Land ownership/operational status: owner, tenant, sharecropper, lessee, FPO member, etc.
- Land size and location: State, district, block and village.
- Crop(s): Kharif/Rabi/annual horticulture; notified crop where insurance or procurement is involved.
- Irrigation: rainfed, borewell, canal, existing electric pump, diesel pump, drip/sprinkler.
- Farm objective: production, diversification, organic/natural farming, processing, storage or marketing.
- Financial need: grant/subsidy, low-cost credit, insurance or price support.
- Digital readiness: Aadhaar, bank account, mobile number, land records, Farmer Registry/eKYC status.

Step 2 — Match the need to the correct programme

If you need...	First check	Then check
Cash income support	PM-KISAN	State farmer-support schemes
Crop loan	KCC + MISS	AIF if building an eligible asset
Crop insurance	PMFBY	State crop notification + deadline
Drip/sprinkler	PMKSY/PDMC	State horticulture/agriculture portal
Tractor/machinery/drone service	SMAM	Custom Hiring Centre / FPO
Solar pump	PM-KUSUM	State implementing agency/vendor window
Soil/fertilizer advice	Soil Health Card	KVK / soil lab / agriculture officer
Cold storage/warehouse	AIF / AMI / MIDH	Bank + project appraisal
Better selling price	e-NAM / PM-AASHA	FPO / APMC / procurement agency
Organic farming	PKVY / MOVCD-NER	State cluster programme
Natural farming	NMNF	State NMNF cluster
Collective marketing	10,000 FPO Scheme	Existing FPO / CBBO

Step 3 — Verify the State implementation

- Check whether the scheme is open in your State for the current financial/crop year.
- Check the notified crop, district, component, beneficiary category and application window.
- Confirm whether support is DBT, reimbursement, credit-linked back-ended subsidy, interest subvention, insurance or an in-kind service.
- Ask for the sanctioned cost ceiling—not merely the headline percentage subsidy.
- Use official portals, State agriculture/horticulture departments, banks, CSCs, KVKs or notified agencies rather than unverified agents.

29. Documents Checklist

Document / information	Why it matters	Schemes where commonly relevant
Aadhaar / government ID	Identity and DBT/eKYC	PM-KISAN, PMFBY, KCC, many State schemes
Aadhaar-seeded bank account	DBT and benefit settlement	PM-KISAN, PMFBY, subsidy programmes

Document / information	Why it matters	Schemes where commonly relevant
Land record / khasra or equivalent	Landholding/cultivation verification	PM-KISAN, PMFBY, PMKSY, SMAM and many State schemes
Cultivation/lease evidence	Important for non-owner cultivators where permitted	KCC, PMFBY and State programmes
Mobile number	OTP, alerts and digital registration	Most digital portals
Bank passbook / cancelled cheque	Account verification	e-NAM, DBT, insurance and credit
Category certificate, where applicable	Higher subsidy/priority in selected components	SMAM and State programmes
Project report / DPR	Project finance/subsidy appraisal	AIF, AMI, MIDH, Operation Greens
FPO/entity registration	Collective/infrastructure support	FPO scheme, AIF, MIDH, MOVCD-NER
Soil test report	Nutrient management	Soil Health Card, natural/organic farming programmes

30. Understanding the Different Types of Government Support

Support type	What it means	Example
DBT	Money transferred directly to beneficiary account	PM-KISAN
Interest subvention	Government reduces effective borrowing cost	KCC/MISS; AIF
Credit guarantee	Government-backed risk cover can make eligible lending easier	AIF; FPO-related finance
Capital subsidy	Government pays a defined share/amount of eligible capital cost	Selected SMAM/MIDH components
Back-ended subsidy	Subsidy is adjusted after project/loan conditions are met	AMI/MIDH-type infrastructure
Insurance subsidy	Government pays part of actuarial premium	PMFBY
Procurement	Government/designated agency buys eligible produce at notified terms	PM-AASHA
Service / infrastructure	Farmer receives testing, training, machinery access, market access, etc.	Soil Health Card, e-NAM, CHCs

31. What Can and Cannot Be Combined?

Many programmes can be complementary, but convergence is not automatic. For example, a farmer may receive PM-KISAN income support, use KCC for seasonal credit, insure a notified crop through PMFBY, obtain soil advice through the Soil Health Card system and use e-NAM for market access. A capital asset, however, cannot normally be financed twice under incompatible subsidies for the same cost component.

Before combining schemes, verify four things: (1) whether double funding is prohibited, (2) whether the same asset/cost is already subsidized, (3) whether the State annual action plan permits convergence, and (4) whether the bank/project appraisal recognizes the government support.

32. How to Use myScheme

The Government's myScheme platform is intended as a one-stop discovery and eligibility platform for government schemes. It supports scheme search, eligibility filtering and detailed scheme pages. Use it as a discovery layer, then confirm the final operational rule on the owning ministry/State/official scheme portal.

Official myScheme portal: <https://www.myscheme.gov.in/>

33. High-Priority Official Portals

Portal	Primary use
PM-KISAN — https://pmkisan.gov.in/	PM-KISAN registration, status, eKYC and beneficiary information
PMFBY — https://pmfbby.gov.in/	Crop insurance enrollment, premium calculator, policy status and grievance tools
PM-KUSUM — https://pmkusum.mnre.gov.in/	Solar pump/solarization programme information
e-NAM — https://www.enam.gov.in/	Digital agricultural market registration and market information
SFAC — https://sfacindia.com/	FPO, e-NAM and agriculture-finance related resources
PMKSY — https://pmksy.gov.in/	Irrigation and micro-irrigation programme information
myScheme — https://www.myscheme.gov.in/	Government scheme discovery and eligibility
AIF — https://agriinfra.dac.gov.in/	Agriculture Infrastructure Fund information and project financing

34. 2026 Status Notes and Important Updates

- PM-KISAN: the official portal shows the 23rd instalment released on 20 June 2026 and emphasizes mandatory eKYC and beneficiary verification.
- KCC: PIB reported in March 2026 that the MISS-linked KCC loan limit had been enhanced to ₹5 lakh, with collateral-free credit raised to ₹2 lakh per borrower.
- PMKSY: PIB's June 2026 backgrounder reported more than 27 million farmers benefited since 2016-17 and 110.92 lakh hectares brought under micro-irrigation through PDMC since inception.
- SMAM: PIB's July 2026 backgrounder reported ₹9,404.47 crore supporting 21.61 lakh machines for individual farmers and more than 40,000 drone demonstrations.
- MIDH: PIB reported in July 2026 that MIDH was restructured in 2025 and now covers all districts, with revised cost norms and additional emphasis on high-value/exotic/medicinal crops and modern horticulture technologies.
- Digital Agriculture Mission: approved in September 2024 with ₹2,817 crore outlay; AgriStack and the Krishi Decision Support System are core pillars.
- NMEO-OS: approved for 2024-25 through 2030-31 with ₹10,103 crore outlay.
- NMNF: approved in November 2024 with ₹2,481 crore outlay and a national natural-farming adoption framework.

35. Official Source Register

The compendium intentionally prioritizes first-party Government sources. Where scheme details can change by State, season or annual action plan, the PDF states that explicitly rather than presenting one national number as universally guaranteed.
